ALI ZAFAR

Cloud Data Engineering Trainee | Python & SQL Enthusiast

Karachi, Pakistan | **Phone:** +92 314 2376952 | **Email:** alizafar.sec1@gmail.com | **LinkedIn:** linkedin.com/in/ali-zafar-sec1

PROFESSIONAL SUMMARY

Motivated and detail-oriented aspiring Data Engineer with a solid foundation in computer science principles through an ICS background. Currently expanding technical expertise as a Cloud Data Engineering Trainee at Saylani Mass IT Training (SMIT). Passionate about programming in Python, designing database schemas with SQL, and understanding foundational data pipelines to transform raw data into actionable insights.

TECHNICAL SKILLS

Programming & Scripting:	Python (Core, Data Structures, OOP Fundamentals)
Database Management:	SQL (Query Optimization, Joins, Schema Design)
Data Engineering Concepts:	ETL Basics, Data Cleaning, Cloud Fundamentals
Tools & Platforms:	VS Code, Git, GitHub

EDUCATION & TRAINING

Cloud Data Engineering Trainee

Saylani Mass IT Training (SMIT) | Karachi, Pakistan *(Ongoing)*

- Developing hands-on expertise in Python programming and writing advanced SQL queries.
- Exploring cloud infrastructure concepts and fundamental data architecture.

Intermediate in Computer Science (ICS)

Karachi, Pakistan

- Main subjects included Computer Science, Mathematics, and Physics.
- Developed foundational understanding of algorithmic logic and basic computing frameworks.

ACADEMIC & PRACTICE PROJECTS

Python Data Manipulation Utilities

- Built basic command-line applications in Python to filter and format mock structured datasets.
- Implemented error handling and file I/O operations to process raw text data efficiently.

Relational Database Design & Querying

- Designed custom database schemas, utilizing relational mapping constraints and primary/foreign keys.
- Practiced complex multi-table SQL JOINs, subqueries, and analytical aggregations.
